## Project Design Phase-II Technology Stack (Architecture & Stack)

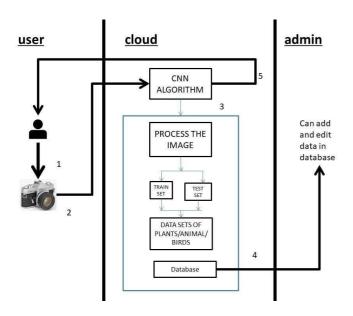

| Date          | 17 October 2022  |
|---------------|--|
| Team ID       | PNT2022TMID18742   |
| Project Name  | <b>Project -</b> Digital Naturalist – AI Enabled tool for Biodiversity Researchers |
| Maximum Marks | 4 Marks  |

## **Technical Architecture:**

The Deliverable shall include the architectural diagram as below and the information as per the table 1 & table 2

**Example: Order processing during pandemics for offline mode** 

Reference: <a href="https://developer.ibm.com/patterns/ai-powered-backend-system-for-order-processing-during-pandemics/">https://developer.ibm.com/patterns/ai-powered-backend-system-for-order-processing-during-pandemics/</a>

## Guidelines:

- 1. Include all the processes (As an application logic / Technology Block)
- 2. Provide infrastructural demarcation (Local / Cloud)
- 3. Indicate external interfaces (third party API's etc.)
- 4. Indicate Data Storage components / services
- 5. Indicate interface to machine learning models (if applicable)

**Table-1: Components & Technologies:** 

| S.No | Component      | Description   | Technology  |
|------|----------------|---|---|
| 1.   | User Interface | How user interacts with application e.g. Web UI, Mobile App, Chatbot etc. | HTML, CSS, JavaScript / Angular Js / React Js etc.                |
| 2.   | Camera         | Capture photos for processing   | Normal phone camera   |
| 3.   | CNN algorithm  | For processing the photos   | -   |
| 4.   | Database       | Data Type, Configurations etc.  | MySQL, etc.   |
| 5.   | Cloud Database | Database Service on Cloud   | IBM DB2, IBM Cloudant etc.  |
| 6.   | File Storage   | File storage requirements   | IBM Block Storage or Other Storage<br>Service or Local Filesystem |
| 7.   | External API-1 | Location service  | Location or google api  |

**Table-2: Application Characteristics:** 

| S.No | Characteristics          | Description   | Technology  |
|------|--------------------------|---|---|
|      |                          |   |   |
| 1.   | Open-Source Frameworks   | Datasets,api etc  | Sql or csv  |
| 2.   | Security Implementations | List all the security / access controls implemented, use of firewalls etc.  | e.g. SHA-256, Encryptions, IAM Controls, OWASP etc. |
| 3.   | Scalable Architecture    | Justify the scalability of architecture (3 – tier, Microservices)   | Python, Mysql                                       |
| 4.   | Availability             | Justify the availability of application (e.g. use of load balancers, distributed servers etc.)                            | Python, Mysql                                       |
| 5.   | Performance              | Design consideration for the performance of the application (number of requests per sec, use of Cache, use of CDN's) etc. | _   |
